

MANUAL

UMLIGC2650000000

Congratulations with your purchase!

THANK YOU for having selected the Etna by Umbrosa.

Your multicolour ambiance LED lamp is rechargeable, waterproof and highly resistant to shock. Your lamp may be used inside, outdoors, floating on water and even hanging somewhere.

PACK CONTENTS

- lamp
- induction charger
- electrical adapte
- infrared remote
- magnet
- storage bag
- manual

USAGE PRECAUTIONS

Carefully read this guide before using your device. We recommend keeping it handy for future use. Always use your lamp in conformity with the utilization precautions. Failure to do so will void any warranty. UMBROSA disclaims any responsibility for incorrect use of the product or the transformer in combination with another product which could be defective, dangerous or inappropriate.

ADVICE FOR THE SAFE HANDLING OF SUPER MAGNETS

Electrical conductivity

Magnets are made of metal and conduct electricity. Children might try to put magnets into a power outlet and thereby suffer from an electric shock. Magnets are not toys! Make sure that children don't play with magnets.

Contusions

Big magnets have a very strong attractive force.

- Unsafe handling could cause jamming of fingers or skin in between magnets. This may lead to contusions and bruises.
- Powerful, very large magnets could cause bone fractures. Wear heavy protective gloves when handling larger magnets.

Pacemaker

Magnets could affect the functioning of pacemakers and implanted heart defibrillators.

- A pacemaker could switch into test mode and cause illness.
- A heart defibrillator may stop working.
- If you wear these devices keep sufficient distance to magnets.
- Warn others who wear these devices from getting too close to magnets.

Heavy objects

Too heavy loads, symptoms of fatigue as well as material defect, could cause a magnet or magnetic hook to loosen from the surface that it was attached to.

Falling objects could lead to serious injuries.

- The indicated adhesive force applies only to ideal conditions. Allow for a high safety cushion.
- Don't use magnets in places where people could sustain injuries in case of material failure.

Magnetic field

Magnets produce a far-reaching, strong magnetic field. They could damage TVs and laptops, computer hard drives, credit and ATM cards, data storage media, mechanical watches, hearing aids and speakers.

- Keep magnets away from devices and objects that could be damaged by strong magnetic fields.
- Please refer to our table of recommended distances: www.supermagnete.ch/eng/faq/distance

Airfreight

Magnetic fields of improperly packaged magnets could influence airplane navigation devices. In the worst case it could lead to an accident.

- Airfreight magnets only in packaging with sufficient magnetic shielding.
- Please refer to the respective regulations: www.supermagnete.ch/eng/faq/airfreight

Postage

Magnetic fields of improperly packaged magnets could cause disturbances in sorting machines and damage fragile goods in other packages.

- Please refer to our shipping tips.
- Use a large box and place the magnet in the middle surrounded by lots of padding material.
- Arrange magnets in a package in a way that the magnetic fields neutralize each other.
- If necessary, use sheet iron to shield the magnetic field.
- There are stricter rules for airfreight: Refer to the warning notice "Airfreight".

ADVICE FOR THE SAFE HANDLING OF SUPER MAGNETS

Influence on people

According to the current level of knowledge, magnetic fields of permanent magnets do not have a measurable positive or negative influence on people. It is unlikely that permanent magnets constitute a health risk, but it cannot be ruled out entirely.

- For your own safety, avoid constant contact with magnets.
- Store large magnets at least one metre away from your body.

Splintering of coating

Most of our neodymium magnets have a thin nickel-copper-nickel coating to protect them from erosion. This coating could splinter or crack due to collision or large pressure. This makes them vulnerable to environmental influences like moisture and they could oxidise.

- Separate big magnets, especially spheres, with a piece of cardboard.
- Avoid collisions of magnets as well as repeated mechanical exposure (e.g. blows, bashes).

Temperature stability

Magnets can withstand only a limited maximum temperature. Depending on the magnet material it ranges anywhere between 80 and 200 °C.

Most of our magnets lose part of their adhesive force permanently at a temperature of 80 °C.

- Don't use magnets in places where they are exposed to extreme heat.
- If you use an adhesive, don't harden it with hot air.

RECYCLING

Do not throw this device away with your regular household garbage. Contact the appropriate service within your community to learn the best way to dispose of the device. Electrical products contain substances harmful to human health and the environment so must be adequately recycled

CHARGING

To guarantee the maximum autonomy of your product, please conform to the precautions first usage precautions

1. Connect the charger.
2. Fully charge your lamp's battery by placing the lamp on the charger for at least 12 hours. A **RED** charge indicator appears on the charger when charging. A **GREEN** luminous indicator indicates the lamp is fully charged.

The light automatically turns off when placed on the Induction charger plate. This to protect the long life of the battery and to assure that charging and discharging is not done simultaneously.

The internal battery does not have a charge accumulator and will require 5 or 6 complete charges/discharges before reaching optimal charge capacity.

It is recommended to empty (discharge) the full capacity of the battery, before recharging fully.

Once fully charged and a green luminous indicator is shown on the induction charger plate, please remove the unit from the plate.

UMBROSA®

ATTACHMENT – FLEXIBLE USE

Use the magnet to fix your Etna to almost any outdoor structure or fabric.
for more detailed information, watch our video on www.umbrosa.com

VARIATION OF COLOURS

Up/down

Choose between one of our pre-programmed colours.

Start a colour mix

which will continue without interruption. To fix a colour press the button again. To continue the cycle use this same button.

Mix/Pause

White + colours (RGB)

Candle mode

Start the candle effect (yellow or orange)

Brightness

Shift through light intensity modes

PURPLE

BLUE/TURQUOISE

GREEN

RED

CANDLE LIGHT MODE

WHITE

LIGHT HOURS (APPROXIMATELY)

| | |
|-------------------------------|-----|
| High intensity in white color | 9h |
| Low intensity in white color | 38h |
| Colour mix | 13h |
| Colour fix | 28h |
| Candle effect | 14h |
| Charging time | 12h |

DO NOT...

CHARGER

- Use near a heat source or expose to fire.
- Touch the charger or charger base while charging.
- Try to open, in case of faultiness please return it to your vendor.
- Keep it plugged in after charging.
- Use outdoors.
- Store in humid area.
- Keep in reach of young children.

LAMP

- Use near a heat source or expose to fire.
- Try to open or dismount the lamp to avoid any risk of electrical shock or altering its waterproofing; failure to comply will cancel your warranty.
- Connect the lamp's base to another device.
- Try to charge the lamp with a charger other than the one supplied in your pack.
- Place your lamp for extended periods in water or bright sunshine. This to avoid dirty water markings on the level of the waterline.

LED MODULE

- Remove the LED module unless it is broken, this to avoid dirty fingerprints on the inside of your lamp and to maintain waterproofness.

UNIT SPECIFICATIONS

| | |
|--------------------|------------------------------|
| LED lifetime | +50.000 hours |
| Battery type | rechargeable lithium-polymer |
| Battery power | 4.000 MAH |
| Battery voltage | 3.7 V |
| Energy consumption | 3.36 W |
| Charging method | induction |
| Remote control | intra-red (included) |
| Input | 100-240V AC-50/60Hz |
| Output | DC7.5V 1.5A |

WARRANTY

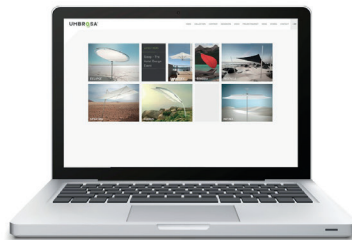

Umbrosa provides a 2 year warranty on manufacturing defects. The warranty applies only when the products are used in accordance with the owner's manual, and properly installed and maintained. The original purchase invoice containing the date of invoicing is your only proof of warranty, and is needed prior to applying the warranty, and starts on the purchase date of the goods. To make the warranty process go smoothly, please address warranty issues to your original point of purchase. They will liaise with Umbrosa Customer Service. Please be prepared to provide the product serial number and digital photos of the problem to make sure the issue is quickly and properly resolved. If the warranty clause applies, Umbrosa commits to replace or repair the defective parts only. Other costs such as the transportation of goods, labor to make repairs etc. is the customers responsibility. Products for commercial use as for hotels, restaurants, etc. reduces the terms of the warranty to 1 year.
